1. Description

These annotations configure elements of a Page Flow web application: page flows, shared flows, etc. All Page Flow annotations come from the annotation interface org.apache.beehive.netui.pageflow.annotations.Jpf

(../apidocs/classref_pageflows/org/apache/beehive/netui/pageflow/annotations/Jpf.html) . To use any of these annotations, include the following import statement in your source file:

```
import org.apache.beehive.netui.pageflow.annotations.Jpf
```
