1.1. Live Sites using POI

Currently we don't have any sites listed that use POI, but we're sure they're out there. Help us change this. If you've written a site that utilises POI let us know.

1.2. Products/Projects using POI

Publically available products/projects using POI include:

- [JTimeTracker](#)

1.3. File Format Descriptions

POI depends on publically available documents describing various file formats. The list below contains links to some of them.
