Reference Guides

by Brian McCallister, Armin Waibel

Table of contents

1. Reference Guides

Here can be found a summary with a explanation of all reference guides.

- PB guide (../../docu/guides/pb-guide.html)
  This document explains specific usage of the *PB-api*.
- ODMG guide (../../docu/guides/odmg-guide.html)
  This document explains specific usage of the *ODMG-api*.
- OJB Queries (../../docu/guides/query.html)
  This document explains the usage of the query syntax.
- Basic O/R Technique (../../docu/guides/basic-technique.html)
  This tutorial explains basic object-relational mapping technique in OJB like 1:1, 1:n and m:n relations, the auto-xxx settings for references and proxy objects/collections.
- Platforms (../../docu/guides/platforms.html)
  What OJB requires from relational databases, and how to let it know which database to use.
- Logging configuration (../../docu/guides/logging.html)
  Details how to configure the logging within OJB.
- OJB.properties configuration (../../docu/guides/ojb-properties.html)
  The details on how to modify OJB's behaviour. This includes changing pluggable components.
- JDBC Types (../../docu/guides/jdbc-types.html)
  This document explains the standard mapping of JDBC types to Java classes.
- Repository Metadata (../../docu/guides/repository.html)
  The specific details of OJB metadata.
- Advanced O/R Technique (../../docu/guides/advanced-technique.html)
  This document explains some advanced O/R techniques like Polymorphism and "OJB Extents", Mapping Inheritance Hierarchies, Nested Objects and so on.
- Metadata Handling (../../docu/guides/metadata.html)
  This document explains how the metadata xml file work and how the metadata information can be modified at runtime.
- Deployment (../../docu/guides/deployment.html)
  Specifics on what is required to deploy OJB, including deployment to EJB containers.
- Connection Handling (../../docu/guides/connection.html)
  This document explains how OJB handles the `Connection` instances and how User's can step in.
- Caching (../../docu/guides/objectcache.html)
  Documentation on the different object caching implementations and strategies included with OJB.
- The Sequence Manager (../../docu/guides/sequencemanager.html)

How to use different sequence management strategies with OJB.
- [Locking](../../docu/guides/lockmanager.html) (../../docu/guides/lockmanager.html)
  The optimistic and pessimistic locking capabilities of OJB.
- [OJB XDoclet Module](../../docu/guides/xdoclet-module.html) (../../docu/guides/xdoclet-module.html)
  Documentation for the OJB XDoclet module. The module can build mappings and schema.
- [OJB Performance](../../docu/guides/performance.html) (../../docu/guides/performance.html)
  A look at how OJB performs and how to use OJB's performance tests.
